

RUSHIKESH PANCHAL

Data Science Intern (Aspiring) | Data Analyst | Machine Learning | Business Intelligence
rushipanchal149@gmail.com | +91 9175362710 | Pune, MH | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Computer Engineering fresher with hands-on expertise in data analytics, business intelligence, and MIS reporting, backed by a strong foundation in machine learning and AI basics. Proficient in Python (Pandas, NumPy, Matplotlib), SQL, Power BI, DAX, and Excel. Built end-to-end BI dashboards, automated ETL pipelines, performed EDA and data visualization, and applied basic ML models (regression, classification, clustering) to generate data-driven insights.

TECHNICAL SKILLS

Languages	Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, DAX
Machine Learning & AI	ML & AI Basics — Supervised/Unsupervised Learning, Regression, Classification, Clustering, Scikit-learn, Model Evaluation
Analytics	EDA, Statistical Analysis, Data Cleaning, Data Wrangling, Data Visualization
BI & Reporting	Power BI, Tableau, Excel (Pivot Tables, VLOOKUP, Power Query), KPI Dashboards, MIS Reports
Databases	MySQL — Joins, Aggregations, Subqueries
Other	ETL Pipeline Design, Data Modeling, Git/GitHub, Jupyter Notebook

KEY PROJECTS

Sales Analytics Dashboard — Power BI · SQL · Python	Jan – Mar 2026
- Built end-to-end Power BI dashboard with KPI cards, Top-N product ranking, and region-wise sales mapping using DAX measures and star-schema data modeling. - Performed EDA & time-series trend analysis in Python to flag 15+ products with high sales but low profit margins, directly actionable for pricing strategy.	
Telco Customer Churn Analysis — Power BI · Python · SQL	Apr – Jun 2025
- Designed two-page Power BI dashboard tracking 26.6% churn rate across 2,000 customers; segmented by contract type, tenure, and payment method. - Applied a basic ML classification model and SQL cohort analysis to identify month-to-month contracts as the top churn driver, laying the foundation for a predictive retention model.	
Smart Attendance System — Python · QR Code · Firebase	Aug – Mar 2026
- Automated attendance tracking with role-based dashboards and real-time QR verification, eliminating 100% manual data entry via MySQL backend. - Built MIS reporting pipeline auto-generating structured attendance analytics reports across batches — enterprise-grade ETL pipeline design.	

PROFESSIONAL EXPERIENCE

Diploma Trainee — Tata Motors	Jan 2023 – Jan 2024
- Supported production planning by analyzing daily output, capacity, and material data across 4+ production lines to improve scheduling accuracy and resource utilization. - Handled manpower planning — shift scheduling, attendance tracking, and workforce allocation — coordinating with supervisors to minimize idle time and meet daily production targets. - Consolidated multi-source operational data (production, manpower, material) into unified reports, improving data accuracy and helping supervisors cut downtime through timely metrics.	

EDUCATION

B.Tech — Computer Science & Engineering	2023 – 2026
Nutan College of Engineering & Research, Pune, Maharashtra	
Diploma — Mechanical Engineering	2019 – 2021
Government Polytechnic Osmanabad, Maharashtra	

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate - IBM SkillsBuild — Data Analytics Fluency Pathway
